MyOutdoorKitchen's ambition is to offer smart and flexible solutions for every customer's need in an outdoor kitchen. With a variety of styles and a myriad of features, MyOutdoorKitchen offer high quality products that will satisfy any outdoor kitchen dream!

MyOutdoorKitchen strive to make outdoor kitchens easy to install, use and maintain. The modular systems are highly versatile – making it easy to add modules and rearrange the kitchen for future needs. All products are made of robust and sustainable stainless steel – resulting in a complete outdoor kitchen that can be enjoyed year after year!

SKELDERVIK^o

True Swedish craftsmanship is at the core of all Skeldervik products which are beautifully defined by clean Scandinavian lines and outstanding quality. Detailed components are married with unique features to deliver a full, close-to-nature cooking experience outdoors. Skeldervik's outdoor kitchens are crafted from durable and resistant high-alloy stainless steel made from Swedish iron ore, with all parts assembled by hand. A Skeldervik outdoor kitchen with its solid, timeless design will bring year-round enjoyment for years to come.

6 CONSIDERATIONS WHEN BUYING AN OUTDOOR

1

Planning!

It is essential to plan carefully, especially if you're building an outdoor kitchen. Key questions to ask yourself are how will you be using your outdoor kitchen, what features do you want it to have and where are you going to place it.

2

Different types of outdoor kitchens

Decide which type of outdoor kitchen you want. Do you want to construct the foundation of your kitchen, in which you integrate modules such as grills and doors, yourself? Or do you want a ready-to-use outdoor kitchen delivered to your home? Decide which type of outdoor kitchen you are interested in

3

Materials

Choose an outdoor kitchen made of materials that will withstand the elements. Make sure that all parts of the outdoor kitchen down to the smallest screws are made of the right material, in order to prevent your summer kitchen from rusting.

4

Different types of grills

The grill is the heart of an outdoor kitchen. Take your time when choosing a grill that is just right for you and your needs. Gas grill, charcoal grill or kamado? You decide!

5

Electricity

Are you planning on having electricity and running water? If you are planning to install the outdoor kitchen without direct connection to your home's electrical system, contact a qualified plumber and electrician!

6

Protective covers

Cover your outdoor kitchen completely to protect it from weather conditions, especially during winter. Invest in a robust cover that can withstand all the elements or choose a free-standing outdoor kitchen that you can simply wheel into the garage before winter arrives

Do you want to see how our outdoor kitchens would look in your own space?
With our 3D tool, you can easily plan and design the outdoor kitchen of your dreams. Once you are happy with your design, simply request a personalised quote at the touch of a button.

TOOL

DIFFERENT TYPES OF STAINLESS STEEL

Most stainless steel outdoor kitchens on the market are made of 430 SS steel, which is suitable for outdoor use, has some resistance to rust and is a wallet-friendly option. Most of the outdoor kitchens we provide are made of 304 SS steel, a grade of steel that provides better resistance to rust and has a longer lifespan. This is because about 10% of the steel consists of nickel - a relatively expensive element that makes 304 SS steel slightly more expensive than 430 SS steel but raises its quality considerably.

WHY CHOOSE AN OUTDOOR KITCHEN MADE OF 304 SS STEEL?

- » Life span and higher quality than other steel types
- » Non-magnetic - does not attract dirt and particles and is easy to clean
- » Easier to maintain than e.g. 430 SS steel which can rust in just a few months if you don't take care of it properly
- » Resistant to weather and wind
- » Greater resistance to rust and corrosion than other steel types
- » Approved for contact with food
- » Withstands temperatures up to 925 degrees

STAINLESS & BLACK COLLECTION

MyOutdoorKitchen

- ✓ High quality 304 SS
- ✓ Combine modules your way
- ✓ Can be placed in an L or U shape

Endless opportunities

The flexible modular system lets you combine all modular units in any way you wish. Choose between more than 15 modules – grills, fridges, storage modules, corner modules, pizza ovens, a sink module and a Teppanyaki module.

Join other modules in a 90° angle

- Stainless Steel
ID: 7640
- Anthracite Black
ID: 7903

Measurements (W x H x D)
80 x 90,5 x 80 cm

Corner module 90° - Large

Handy storage space within the corner module

A corner module transforms an outdoor kitchen into a wonderfully open and spacious cooking area with a 90° L-shaped design. It fits perfectly in a corner on your patio or outdoor space, enhancing the stylish look of your outdoor kitchen. This type of module is extremely handy, as its top doubles as an additional workspace for food preparation. Made of finest 304 stainless steel with a sleek finish in either stainless steel or anthracite black, it is available in smaller or larger size – the choice is all yours!

Sink and storage module

Before and after using the grill you need running water to wash your hands and rinse vegetables and meat, and workspace to chop and cut food. A robust and durable module made of 304 stainless steel. Lots of useful storage space behind the 2 cabinet doors below the sink unit. Keep cooking utensils, a waste bin and other items out of sight yet close at hand. A top-class module and a must in your outdoor kitchen!
